

The Conference was organized by the Romanian Society of Analytical Chemistry in cooperation with the Transylvania University in Brasov and DAC/FECS. The about 40 participants found an excellent venue in the newly constructed conference building of the University. Lectures were given by Klara Toth (Hungary), Marjan Veber (Slovenia), Ernst-Heiner Korte (Germany) and Jiri Zima (Czech Republic), as well as Anton Ciucu, University of Bucharest and others. The programme was structured in the sections related to Separations, Electrometric Methods, Spectrometry and miscellaneous topics. All contributions were presented orally and in English. The majority of speakers were young researches who presented their results with enthusiasm and professional skills. Throughout, the quality of research was high and the discussions were vivid.

The participants enjoyed George Baiulescu's organization including social events to promote the contacts between the participants and an excursion to Sighisoara and Bran castle as Transylvanian highlights.
